

Step 1: Asset Identification & Inventory

Organization: Croshop Private Limited.

1.1 Overview and Methodology

The "Identify" phase is the critical first step in the NIST CSF 2.0 framework, focused on developing an organizational understanding of how to manage cybersecurity risk to systems, people, assets, data, and capabilities.

For **Croshop Private Limited**, the identification process followed these steps:

- **Asset Discovery:** Conducted a comprehensive review of the physical and digital environment used to support 60+ artisans and regional partners.
- **Classification & Criticality:** Each asset was analyzed for its business value and the potential impact of its loss on the initiative's social-impact mission.
- **NIST Category Mapping:** Assets were mapped to specific NIST CSF 2.0 subcategories (ID.AM-01 through ID.AM-03) to ensure alignment with global standards.

1.2 Enterprise Asset Register

This register provides the visibility required to prioritize security investments and protect the intellectual property that fuels artisan income.

Asset ID	Asset Name	Asset Category	NIST Mapping	Criticality	Business Value / Risk
DS-01	Instructional Training Videos	Intellectual Property	ID.AM-02	CRITICAL	Core of the skill-development mission; irreplaceable if lost.
DS-02	Master Crochet Patterns	Intellectual Property	ID.AM-02	HIGH	Proprietary designs that differentiate Croshop in the market.
DA-01	Partner & NGO Contacts	Data (PII)	ID.AM-02	HIGH	Vital relationships with NGO partners; essential for the pipeline.

DA-02	Artisan Payment Logs	Financial Data	ID.AM-02	CRITICAL	Legal/Ethical record of income generation for 60+ women.
SW-01	WhatsApp / Regional Groups	Communication	ID.AM-03	HIGH	Primary "command and control" for remote training and demos.
SW-02	Banking & Payment Portals	Financial Software	ID.AM-03	CRITICAL	Essential for revenue flow and supplier payments.
SW-03	Cloud Storage (Drive/iCloud)	Software/Storage	ID.AM-03	MEDIUM	Central repository for all marketing and training backups.
SW-04	E-commerce Website	Software/Digital	ID.AM-03	MEDIUM	The public "face" and showcase for sustainable products.
DM-01	Marketing Media	Digital Media	ID.AM-02	MEDIUM	Used for impact-driven storytelling and social campaigns.
HW-01	Company Laptop & Smartphones	Hardware	ID.AM-01	HIGH	Physical tools used to manage operations and marketing.
HW-02	POS / Square Terminals	Hardware	ID.AM-01	MEDIUM	Used for processing transactions at popup stalls.
PH-01	Raw Materials & Inventory	Physical Asset	ID.AM-01	MEDIUM	Yarn, hooks, and finished products ready for fulfillment.

1.3 Strategic Conclusion

Establishing this baseline inventory ensures that Croshop's security strategy is "high-signal," focusing resources on the assets most vital to organizational resilience and the empowerment of its artisan network. This register serves as the authoritative source for the **Govern** and **Protect** phases of this NIST CSF 2.0 implementation.
