

Audit Report: NIST CSF 2.0 Gap Assessment

Report ID: CP-PR-GA-01

Organization: Croshop Private Limited

Framework Version: NIST CSF 2.0 (Focus: Protect & Detect)

1. Executive Summary

A baseline security assessment was conducted against the **Enterprise Asset Register (Step 1)** to determine the current maturity of Croshop’s security controls. The assessment identified critical gaps in authentication and data redundancy that pose a high risk to the organization's intellectual property and financial integrity.

2. Gap Analysis Matrix

NIST Subcategory	Asset Impacted	Requirement	Current Status	The Gap (The Risk)	Priority
PR.AA-03	SW-02 (Banking) & DA-02 (Logs)	MFA must be enforced for all critical portals.	Partial (Banking only)	Admin accounts and payment logs lack MFA; high risk of credential theft.	CRITICAL
PR.AT-01	SW-01 (WhatsApp Groups)	60+ users must receive baseline security training.	Not Started	Artisans lack basic phishing/security awareness; risk of social engineering.	HIGH
PR.DS-01	DS-01 (Videos) & DS-02 (Patterns)	Redundant, off-site backups must be maintained.	Manual / Local	No automated cloud sync; risk of permanent IP loss if hardware fails.	HIGH

PR.PS-01	HW-01 (Laptops/ Phones)	Physical hardware must be tracked/manag ed.	Ad-hoc	No formal device tracking or remote-wipe capability for lost devices.	MEDIUM
-----------------	--------------------------------------	---	--------	---	---------------

3. Recommendations

1. **Immediate:** Enforce MFA across all Google Workspace/Cloud Storage accounts.
2. **Short-Term:** Implement an automated daily backup routine for all Master Patterns.
3. **Ongoing:** Deliver a "Mobile Security Basics" training module to the artisan network via WhatsApp.
